CEREMP Overview (1/2)

Main goals of CEREMP System

- Provide central register of market participants based on national registers;
- Ensure each market participant has one and only unique identifier (ACER code);
- Ensure historical database for changes, additions and deletions;
- Ensure secure access to appropriate data views to the different authorized parties; and
- For NRAs willing to do so:
  - ✓ Provide NRAs with integrated system for National registers.

CEREMP Overview (2/2)

Article 9 of REMIT:

- *"Market participants (...) shall register with the **national regulatory authority** in the Member State in which they are established or resident or, if they are not established or resident in the Union, in a Member State in which they are active".*

Options for NRAs:

A. NRAs using CEREMP for national register:

- NRAs fully use the ACER system for their National Registers and allow their MPs to submit a request for registration directly on the ACER system.

B. NRAs not using CEREMP for national register:

- NRAs manage National Registers on their own, therefore MPs are not users of CEREMP.

Current Status of CEREMP (1 / 2)

Final testing phase with NRAs:

- Two groups
  - ✓ Group 1 -> November
  - ✓ Group 2 -> December
  - ✓ Contingency Group -> January

Market Participants are welcome to contact NRA for testing!

Current Status of CEREMP (2/2)

Availability of the system:

- Article 9 (2) of REMIT:
  - ✓ *"Not later than 3 months after (...) the Commission adopts the implementing acts (...) national regulatory authorities shall establish national registers of market participants which they shall keep up to date".*
- Implementing acts currently under development:
  - ✓ entering into force probably Mid 2014
- CEREMP will be available even before that date, but it dependents on NRAs decision when registration will start in every Member State!
